	Examiner Deborah Yee	Art Unit 1742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 to 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuoka et al (US Patent 6,818,074), Issartel et al. (US Patent 6,797,078) or Soshiroda et al. (US Patent 6,280,538).

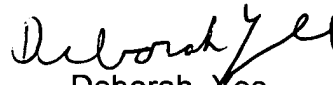

3. Matsuoka in claims 1 to 4 in columns 61 and 62, Soshiroda in claims 1 to 18 of columns 10-12, and Issartel in claims 1 to 10 of columns 7-9, each teach a steel sheet alloy having constituents whose wt% ranges overlap those recited by claims 1 to 5; such overlap renders applicant's composition prima facie obvious despite differences in non-overlapping areas because it would be obvious to one of ordinary skill in the art to select the claimed wt% ranges from the broader disclosure of the prior art because the prior art has the same utility (press working automobile and machine components), and has similar properties of high ductility, high strength and excellent press forming (equivalent to bendability). Moreover, prior art alloys have ferrite as the predominant microstructure with retained austenite in vol% ranges which overlap those recited by the claims.

4. Even though prior art does not teach no more than 40 carbide grains per 2000 micron² as recited by the claims, such property would be expect since composition and property limitations are closely met and in absence of proof to the contrary.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on Monday-Friday from 6:00 to 2:30.
